

# FOAM THE TROUBLEMAKER

## CHALLENGE

.....  
Finding the right defoamer is about striking a balance between efficiency and compatibility

Impacts:

Disrupted production process and increased production time

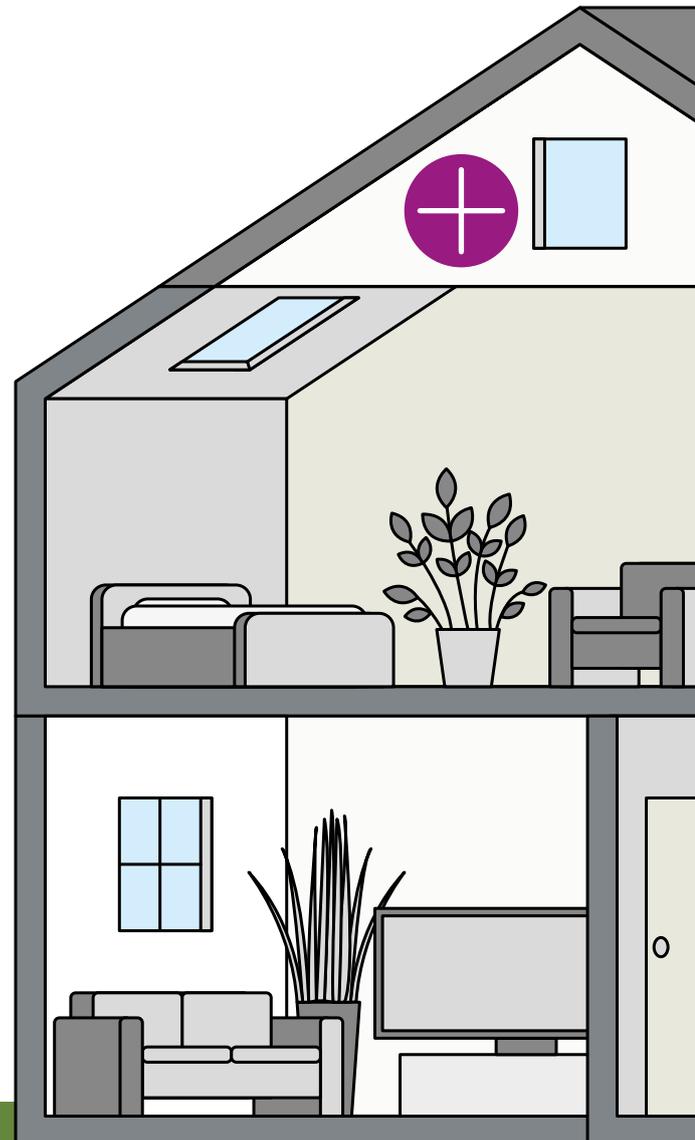

- Less efficient milling process
- Longer filling times

Negatively affected paint transfer and disturbed application

- Longer application time
- Inhomogeneous surface appearance

Substantial quality loss and surface defects

- Reduction of gloss
- Craters or bubbles on the surface
- Loss of protection

# SOLUTION

.....  
The **TEGO® Foamex** architectural defoamer portfolio is suitable for all kinds of PVCs at any stage of the production and application processes.

Find our dedicated Portfolio to cover major needs in Architectural paints
